

Series 1-DC

7-40Amp • 0-500 Vdc • DC Output

- MOSFET Output
- Low On-State Resistance
- Paralleling Capability for Higher Currents
- Panel Mount

DC output relays feature MOSFET technology for low on-state resistance, assuring easy paralleling and switching capabilities to 40 amps at 100 Vdc. Lower current models are also available to 500 Vdc. All models come in Crydom's standard panel-mount package. Manufactured in Crydom's ISO 9001 Certified facility for optimum product performance and reliability.

GENERAL SPECIFICATIONS

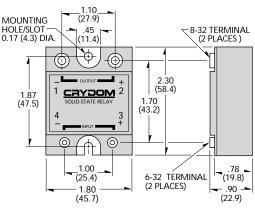

Dielectric Strength 60Hz	2500 Vrms	
Insulation Resistance (Min.) @ 500 Vdc	10 ⁹ Ohm	
Max. Capacitance Input/Output	50 pF	
Ambient Operating Temperature Range	-30 to 80°C

MECHANICAL SPECIFICATIONS

Weight: (typical) 3.0 oz. (86.5g)

Encapsulation: Thermally Conductive Epoxy

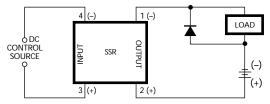

Terminals: Screws and Saddle Clamps Furnished, Unmounted

All dimensions are in inches (millimeters)

Screw Torque Requirements: 6-32 Screws - 10 in. lbs., 8-32 and 10-32 Screws - 20in. lbs. (Screws dry without grease.)

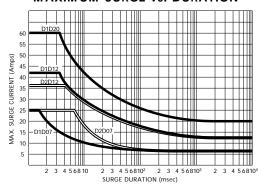

Input and output polarity must be observed. Inductive loads must be diode suppressed.

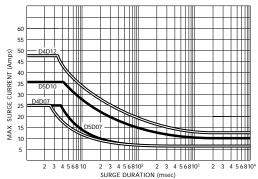

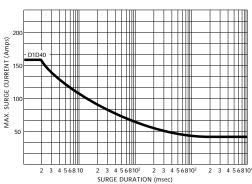

Transient Protection

All loads are inductive, even ones that are not so labeled. An inductive load will produce harmful transient voltages when it is turned off. The more perfect the switch, the larger the transient voltages; the MOSFET output is so nearly an ideal switch that the transient voltages produced by seemingly "non-inductive" loads can cause damage if not suppressed. Diodes should be fast recovery type with PIV rated greater than supply voltage.
